

NEW PBE TRAINING HOOD

P/N 6485-001 Unit with Red Ball (Replaces MR-10021NAA)

P/N 6485-006 Unit Standard (Replaces MR-10021N)

Essex now has an exclusive partnership agreement with Tulmar Safety Systems, Inc. to supply PBE training hoods for its customers.

The Essex PBE (Protective Breathing Equipment) provides crewmembers with ocular, head and respiratory protection during emergency conditions in an aircraft cabin.

Training hoods allow airline personnel to practice donning the hood prior to a smoke emergency. Tulmar manufactures realistic training hoods that feel and operate like the actual PBE. These training hoods are durable and washable to withstand multiple sessions and users. Tulmar offers a repair service and replacement neckpieces.

FEATURES

- **Realistic**—Similar in appearance and weight. Comes complete with simulated actuation clips, weighted simulated O₂ cylinders and a removable neck seal.
- **Easy to Use**—Simulated actuation clips reset in seconds.
- **Durable**—Robust materials withstand the repetitive use of training.
- **Washable**—Textile portion of the product washable in a conventional machine.
- **Reparable**—Textile portion is repairable. Replacement neckpieces available in latex (6412-NP) or non-latex (6412-001) versions.
